High-praise Exam Dumps Questions grant you success by high pass rate - ITPassLeader

Exam : **CPSA**

Title : Card Production Security
Assessor (CPSA) Qualification
Exam

Vendor : PCI

Version : DEMO

NO.1 The vendor's technical documentation shows that the alarm system does not send alerts to the security control room. After a discussion you learn that the alarm works perfectly, and sends a clear signal to summon the local police every time an emergency exit is opened. Why might this cause a problem for their assessment?

- A. During working hours, the alarm should be managed in the security control room, or by a central monitoring service
- B. If the local police receive too many false-positive alerts, they may not respond within 15 minutes of the alarm
- C. During busy times, the local police may not be able to respond
- D. If the local police have not been issued with an exterior key, they will not be able to investigate the cause of the alarm and reset it

Answer: B

NO.2 In which of the following locations must the CCTV and access control servers be located?

- A. Within the secure server room inside of the HSA
- B. Within a room in the HSA with security controls equivalent to the SCR applied
- C. Within the SCR or a room with equivalent security
- D. Within the Security Control Room (SCR)

Answer: C

NO.3 A vendor's HSA access is enforced by a security turnstile they have a logical access-control system that ensures anti pass-back. The device is functioning correctly. When must the status of the access change?

- A. Only when the person has successfully completed the access cycle
- B. Upon initial presentation of an authorised badge, prior to completion of the access cycle
- C. Only when an unauthorised badge is presented
- D. Upon initial entry of the person into the device, prior to completion of the access cycle

Answer: B

NO.4 Which of the following principles must be enforce by the HSA Access Control system?

- A. Dual control and dual presence
- B. Dual guard entry when required
