Exam : **S2000-024**

Title : IBM PowerVC v2.2
Administrator Specialty

Vendor : IBM

Version : DEMO

NO.1 How does 'Compliance Auditing' in PowerVC aid system administrators?

Response:

- A.** By monitoring adherence to gaming rules
- B.** Through tracking and ensuring the environment adheres to set policies and standards
- C.** Auditing social media compliance
- D.** Ensuring digital content meets copyright laws

Answer: B

NO.2 A PowerVC managed environment has four hosts within a host group with these resources:

- Host1 - 8 processors with 2 allocated
- Host2 - 10 processors with 5 allocated
- Host3 - 20 processors with 12 allocated
- Host4 - 24 processors with 18 allocated

An administrator wants to deploy a VM with 2 processors to the host group with the CPU allocation balanced placement policy. Which of these hosts will be picked for the VM?

Response:

- A.** Host1
- B.** Host2
- C.** Host3
- D.** Host4

Answer: A

NO.3 An administrator wants to add a volume to an Image. How can this be done?

Select two.

Response:

- A.** In a deployment using the Image, add the volume and select the Update image (lag).
- B.** In the Volumes section of the Image, add the volume.
- C.** Delete the Image, but not the volumes. Create a new Image with the volumes and the additional volume.
- D.** Use the `powervc-image add <image> <volume(s)>` command.
- E.** Deploy the Image, add the volume to the VM and capture the Image again.

Answer: A,D

NO.4 How and when are compute templates used?

Response:

- A.** Used when deploying an image to select the host system on which the VM will be created
- B.** Used automatically when capturing a VM image so VMs created while deploying have identical configurations
- C.** Used when deploying an image to determine the CPU and memory resources that will be configured for the VM
- D.** Used automatically when deleting a VM so that the VM can be recreated with an identical configuration if needed

Answer: C

NO.5 How does PowerVC integration with public cloud platforms aid in disaster recovery planning?

Response:

- A. By providing backup gaming servers
- B. Through off-site data replication and quick recovery options
- C. By backing up social media profiles
- D. Through storing digital marketing materials

Answer: B

NO.6 What is the function of 'VM Lifecycle Policies' in PowerVC?

Response:

- A. Managing the lifecycle of characters in virtual worlds
- B. Defining policies for the creation, management, and retirement of VMs
- C. Setting policies for the lifespan of social media content
- D. Determining the lifecycle of digital content projects

Answer: B

NO.7 In PowerVC, what is the function of 'Customizable Alert Thresholds'?

Response:

- A. Setting alerts for gaming achievements
- B. Defining specific parameters for system alerts to proactively manage resources
- C. Alerting users about social media notifications
- D. Notifying when digital content reaches certain view counts

Answer: B

NO.8 An administrator has an environment variable called TOKEN on a Linux virtual machine. They run this command that uses the PowerVC REST API.

```
curl -X GET -k -H 'Content-Type: application/json' -H "X-Auth-Token: $TOKEN" -i 'https://<IPADDRESS>:8774/v2.1/servers'
```

What does the command return?

Response:

- A. A list of available images
- B. A list of all available resources
- C. A list of available virtual machines
- D. A list of all available storage devices

Answer: C

NO.9 How does 'Resource Grouping' in PowerVC aid in cloud resource management?

Response:

- A. Through creating digital music playlists
- B. By grouping social media contacts
- C. Through categorizing and managing resources based on similar characteristics or requirements
- D. By organizing online gaming leagues

Answer: C

NO.10 What is the role of 'Tagging' in PowerVC's resource management?

Response:

- A. To enhance graphics rendering
- B. For organizing and identifying resources for easier management
- C. To track employee attendance
- D. For online advertising

Answer: B

NO.11 In PowerVC, what is the primary function of the Network Virtualization feature?

Response:

- A. Managing physical network infrastructure
- B. Providing enhanced data encryption
- C. Creating and managing virtual networks
- D. Monitoring internet bandwidth usage

Answer: C

NO.12 How does 'Resource Grouping' in PowerVC aid in cloud resource management?

Response:

- A. By organizing online gaming leagues
- B. Through categorizing and managing resources based on similar characteristics or requirements
- C. By grouping social media contacts
- D. Through creating digital music playlists

Answer: B

NO.13 In PowerVC, what are the primary purposes of 'Automated VM Provisioning'?

(Choose two)

Response:

- A. Reducing manual efforts in VM deployment
- B. Enhancing gaming experiences
- C. Streamlining the process of VM creation and setup
- D. Optimizing social media integration

Answer: A,C

NO.14 How does 'Predictive Analysis' in PowerVC enhance system management?

Response:

- A. By predicting trends in the gaming industry
- B. Through analyzing system usage patterns to anticipate future resource needs
- C. Predicting social media trends
- D. Forecasting digital marketing outcomes

Answer: B

NO.15 Which statement correctly describes the set of backend user authentication methods supported by PowerVC?

Response:

- A. Local OS users only
- B. Local OS users and Network Information System (NIS) users
- C. Local OS users and Lightweight Directory Access Protocol (LDAP) users
- D. Local OS users, Network Information System (NIS) users, and Lightweight Directory Access Protocol (LDAP) users

Answer: C

NO.16 What functionality does 'Centralized Logging' provide in a PowerVC environment?

Response:

- A. Logging online gaming activities
- B. Consolidating logs from various components for simplified troubleshooting and analysis
- C. Recording social media interactions
- D. Keeping track of digital content views

Answer: B

NO.17 In the context of PowerVC, what is the primary benefit of using 'Shared Storage Pools'?

Response:

- A. Enabling social media integrations
- B. Facilitating easier hardware upgrades
- C. Providing efficient and flexible storage management
- D. Reducing electricity consumption

Answer: C

NO.18 How do 'Customizable Dashboards' in PowerVC assist administrators?

Response:

- A. By offering customizable gaming interfaces
- B. Through providing personalized views of system performance and resource utilization
- C. By enabling personalized social media feeds
- D. Through offering customizable shopping experiences

Answer: B

NO.19 What role does 'Capacity Monitoring' play in PowerVC's cloud environment?

Response:

- A. Monitoring capacity for online events
- B. Providing insights into resource utilization and future capacity needs
- C. Tracking social media follower growth
- D. Monitoring digital content storage

Answer: B
